

Status & gaps for data coming from BiodivERsa partner agencies (11.07.2013)

RCN - Norway

- Period for which data are available: 2000-2011
- Detailed project info is still missing for the “Biological Diversity Dynamics, Threat & Management” and “Marine Resources: Environment and Management (MARE)” programmes
- Funding programme budget number are available (except for “Non Thematic Curiosity driven”), but have not yet been included in the digital database (due summer 2013)

RCL – Lithuania

- Period for which data are available: 2010-2014 (no mandate to fund projects before 2010)
- Funding programme & project info still lacking for the 2010 & 2011 Annual Calls (Ecosystems in Lithuania: Climate change and Human Impact)

BELSPO – Belgium

- Period for which data are available: 2000-2012
- Some data are still lacking for the “BELISA” and “DIGITIZATION CALLS”; other missing info such as project abstracts for the “Impulse for research in the Belgian federal scientific institutes” cannot be retrieved

FRB – France

- Period for which data are available: 2003-2012
- Entries should be reorganized, and completed with data that are currently available, but not yet digitized (due summer 2013)

ANR – France

- Period for which data are available: 2006-2012
- Entries should be reorganized, and completed with data that are currently available, but not yet digitized – especially with regard to “Blanc” and “Systerra” (due summer 2013)

MEDDE – France

- Period for which data are available: 2009-2012
- Entries should be reorganized, and completed with data that are currently available, but not yet digitized (due summer 2013)

VM, National Innovation Office (formerly National Office for Research and Technology), Hungarian Scientific Research Fund (formerly National Research Fund) - Hungary

- VM: Period for which data are available: 2011-2013; data before that date have not yet been provided
- National Innovation Office: 2004-2008; data before and after these dates have not yet been provided
- Hungarian Scientific Research fund: 2003-2011
- Funding programme budget numbers are missing

DFG – Germany

- No data (due to privacy constraints), just a list of 10 blue sky FPs + confirmation that DFG does not have any biodiversity specific FP

- For other project info, DFG refers to the GEPRIS database available on <http://gepris.dfg.de/gepris/OCTOPUS/>

DLR – Germany

- No data received so far, just a list of FPs but very unclear whether these are truly/solely funded by DLR

DEFRA – UK

- Period for which data are available: 2006-2011
- People data largely lacking; but otherwise very complete

NERC – UK

- Period for which data are available: 2000-2011
- No major gaps

JNCC – UK

- Selected data from 2010-2012 period have been received, but not yet imported because link between projects and funding programmes still needs to be resolved

NWO – The Netherlands

- Period for which data are available: 2000-2012
- Pretty complete except for project abstracts within the following FPs:
 - Biodiversity in relation to global change
 - Ecology regarding genetically modified organisms, yrs 2008-2009-2010
 - Innovational Research Incentives Scheme Veni, yrs 2009-2010-2011
 - Innovational Research Incentives Scheme Vici, yrs 2010-2011
 - Meervoud 2008-2009 & 2010
 - National Programme Sea & Coastal research
 - Netherlands Polar Program 2009, 2010, 2012
 - Geosphere-Biosphere, yrs 2004 & 2006
 - Open Programme 2009, 2010 & 2011
 - Rubicon 2008
 - Biodiversity Works 2012-2017
 - Simulation programme biodiversity (1999-2007)
 - Top grants

SEPA – Sweden

- Very incomplete; only FPs with start date in 2001 & 2003

FORMAS – Sweden

- Period for which data are available: 2000-2011
- Pretty complete, just a few project abstracts are missing

FWF – Austria

- Period for which data are available: 2000-2012
- In the database, as it stands now, project budget numbers and links between projects & funding programmes are not known; some project abstracts are also missing. What we do have, as separate information, is the annual amount of money allocated to biodiversity research for the period 2000-2012. Most of them (90%) belong to Stand Alone projects, 5% to Translational and 5% to Schrödinger

ETAG – Estonia

- Period for which data are available: 2003 – 2012
- Funding programme budget numbers are available, but have not yet been included in the digital

database (due summer 2013)

BNSF – Bulgaria

- Period for which data are available: 2008-2009 (not before and after that date)
- Project info (abstract and budget info) is missing in several cases

MFAL – Turkey

- Period for which data are available: 2004-2011
- Projects have an overall budget, but how this money is spread in time depends on yearly priorities. Therefore, it might be better to consider “umbrella budget numbers” for 2005-2006, and 2007-2013. We have this info, but it has not yet been included in the database. Budget numbers for funding programmes are also missing

TUBITAK – Turkey

- Period for which data are available: 2006-2011
- Same as for MFAL.

MINECO – Spain

- Period for which data are available: 2004 – 2011
- Pretty complete except for detailed project info on the 2007 Call

FCT – Portugal

- Period for which data are available : 2002 – 2011; the only FPs included in the database are
 - R&D Projects in All Scientific Domains
 - POCTI (2000-2006) Funding reimbursed equally by EU funds (FEDER: European Regional Development Fund and FSE: European Social Fund) and by national funds
 - POCI (2005-2010) Funding reimbursed equally by EU funds (FEDER: European Regional Development Fund and FSE: European Social Fund) and by national funds
 - Long term ecosystem research call 2009
 - Advanced Fellowships and Grants (including Projects in History of Science)
- Project abstracts are missing in all cases, and R&D Project info is also very incomplete. The latter can be found on the R&D project website: www.fct.pt but digital export is not feasible for now
- There are still some more FCT FPs that fund biodiversity research, but we have no info on these:
 - FCT Research Programm
 - FCT PhD Programmes
 - Projects under the agreement with FCT and ANR (French Agence Nationale de la Recherche)
 - The Scientific Community Support Programme (FACC)
 - Transnational Cooperation, including EU funding, bilateral and multilateral programmes

In some cases, missing data can be retrieved for the agency's project database:

- [GEPRIS database](#) (DFG-German Research Foundation)
- [ENVIROBASE](#), a development of the Environmental Research Database which now includes information about environmental observations collated by the UK Environmental Observation Framework
- [DEFRA's database](#) (The Department of the Environment, Food and Rural Affairs)
- [R&D Projects Database](#) (FCT Fundação para a Ciência e a Tecnologia)
- [INVENT database](#) (BELSPO-Belgian Science Policy)
- [FEDRA database](#) (BELSPO-Belgian Science Policy)
- [RCN's projects database](#) (RCN-Research Council Norway)
- [FRB's database](#) (FRB-Fondation pour la Recherche sur la Biodiversité)
